

Founded in 2009, United Tissue Network (UTN) is a nonprofit, AATB accredited, non-transplant anatomical tissue bank that provides cadaver specimens to approved medical professionals dedicated to the advancement of medical technology, training and education. UTN supports the development of new products to innovate patient care. This includes, but is not limited to, neurosurgical, orthopedic, biomechanics, sports medicine and robotics.

AATB ACCREDITED

The American Association of Tissue Banks (AATB) provides confidence that we operate only through safe practices and provide trusted tissue.
